

BIO

Anne Moen, RN, PhD, FACMI, FIAHSI

Anne Moen is full professor at the Faculty of Medicine at the University of Oslo, Oslo, Norway, and adjunct Professor, Norwegian Center for eHealth Research, Tromsø, Norway. Her focus in health informatics research is design and deployment of digital tools and accompanying services, emphasizing citizen empowerment, digital health literacy and overall engagement for health and wellness.

She is Director of UiO:eColab, Institute for health and society, a research lab supporting technology mediated complex, patient focused interventions in primary care or the home, and multidisciplinary teamwork where health professionals, patients and their families collaborates to sustain health and wellbeing. Her program of research seeks to better understand digital citizens centered services, based on opportunities to "collect, curate and control" all relevant, personal health information. Her most recent research projects include "CAPABLE: empower citizens to active use of their health information" (Public sector Innovation, Norwegian Research Council (2018 - 2021)) and *SUCCESS* ("SUccessful Caregiver Communication and Everyday Situation Support in dementia care" (AAL program (2017 -2020))).

She is the Coordinator of "Gravitate - Health: Empowering and Equipping Europeans with Health Information from trusted sources for active, safe, secure personal health management and adherence to treatment" (Research and Innovation, Public-Private Partnership, funded by IMI2 JU, 2020-2025). Gravitate-Health's mission is to prepare and test innovative, easy-to-use elegant digital services that actively engage and empower citizens and their support network with access to and understanding of health information from trusted sources. The medicinal product information - currently paper based, enclosed with every dispensed pack - is a key source and starting point. The Gravitate-Health consortium has 39 members from 15 countries in Europe and USA, 28 public partners from research and innovation, standardization organizations, patient advocacy groups, health enterprises and SMEs and software developers, and 11 private partners from Pharmaceutical industry, and Medicinal product information provider. More information is available at www.gravitatehealth.eu

She is Past President of EFMI (European Federation for Medical Informatics) and IMIA-EFMI Vice President (2016-2018). Anne is founding member of the Norwegian Nurses Organisation's special interest group on Nursing informatics and eHealth (1998), and

past chair of the Norwegian Society for Medical Informatics (2009-2016).

She served as EFMI representative in EU eHealth stakeholder group (2015 - 2019), and was rapporteur for "Citizens - health data". She was elected to ACMI (American College of Medical Informatics) 2015, founding fellow of IAHSI (International Academy for Health Sciences Informatics) 2017, and Honorary Fellow of EFMI 2019.

Anne Moen is an RN (1985), with a master degree in nursing science (1996), and PhD in social sciences (Dr. polit) - specialization in health informatics (2002) from University of Oslo, Norway. She had been Fulbright fellow (2002) and postdoc at University of Wisconsin-Madison and UiO (2002 - 2005) and visiting scientist at University of Wisconsin-Madison - Health systems Lab (Patricia F. Brennan PI).
